Ultra-premium Forged Performance

EPIC FORGED IRONS

Ultra-premium Forged Performance

Ultra-premium Forged Design for Pure Sound & Feel

Incredibly pure feel, with exceptional sound and turf interaction at impact from a Forged 1025 Carbon Steel body. And our patented urethane microspheres comprehensively absorb unwanted vibration without slowing the face.

Controlled Launch and Distance from the Suspended Tungsten Core

For the first time, we've implemented our Suspended Tungsten Core into a forged iron. It suspends the custom tungsten weight using our Urethane Microspheres, allowing us to precisely position the Center of Gravity.

360 Face Cup for Industry-Leading Ball Speeds

Our renowned 360 Face Cup employs a shallow, flexible rim around the perimeter of the face that flexes and releases at impact to promote fast ball speed.

Spin Control VFT for Consistent Distance

To provide spin and control in the mid and long irons, we've applied a new VFT pattern which promotes consistent ball speed and spin rates.

Ultra-premium Components

To complete the performance package, Epic Forged is available in stock Aerotech Steelfiber FC and Mitsubishi Tensei AV Silver shaft options, and Golf Pride Tour Velvet Align Silver grips.
