SPIN WITH TEETH

JAWS Groove Design

Innovative JAWS groove designed with extremely sharp edge radius to impart more spin for precise control.

Precisely Shaped for A Beautiful Look and Extraordinary Feel from 8620 Mild Carbon Steel

Shaped by Roger Cleveland, these premium heads exude quality and superiority from every angle, while also delivering a soft and satisfying feel no other wedge can match.

W and S Grind

The popular S and W grind are available in a multitude of loft and bounce combinations

Optimized Head Progression

Head shaping progresses from traditional shaped lob and sand wedges to a compact player preferred design in the gap wedge.
