

# THE ULTIMATE IN LIGHTWEIGHT PERFORMANCE

## EXCEPTIONAL DISTANCE WITH EASY LAUNCH

### EASIER TO SWING

The Epic Max Star Driver is 52 grams lighter than the Epic MAX Driver making it incredibly easy to swing with more speed. Our new A.I.-designed Jailbreak Speed Frame is designed to enhance horizontal and torsional stability to promote an increase in ball speeds across the face. Additionally, the A.I.-designed Flash Face promotes fast speeds across a more expansive area.

### INCREDIBLY FORGIVING

Epic MAX Star creates exceptionally high forgiveness, starting with a lighter, stronger triaxial carbon material that saves significant weight vs. titanium. Our engineers have redistributed that saved weight to promote high launch and more forgiveness. An additional triaxial carbon toe patch adds draw bias while saving weight to promote a powerful shot shape.

### SHOT SHAPE CONTROL FROM LIGHTWEIGHT TITANIUM SLIDER

With a 9g adjustable sliding rear weight, golfers have the ability to promote the ball flight that they want to play.

### PREMIUM ULTRA-LIGHTWEIGHT COMPONENTS

The ultra-premium ATTAS Speed T1100 Shaft is just 36 grams, combined with a Winn Dri-Tac Lite Grip that's just 25 grams, and a D1 swingweight.

### SPECIFICATIONS

MODEL	AVAILABILITY	LENGTH	LIE	CC	SWING WEIGHT
10.5°	RH/LH	46"	59.5°	460	D1
12°	RH	46"	59.5°	460	D1
