

WOMENS ROGUE ST

OUR FASTEST, MOST STABLE DRIVER EVER

ROGUE ST MAX D

Rogue ST Max D is for the golfer that needs a high level of draw bias from their driver. It's built for very high MOI, with a more upright lie, reduced face progression, along with internal and external draw weighting, and a generous/stretched profile at address for maximum shot shape correction.

INCREASED SPEED, STABILITY & HIGH MOI FROM ALL-NEW TUNGSTEN SPEED CARTRIDGE

The groundbreaking new Tungsten Speed Cartridge structure places up to 20 grams low and deep in the driver head. This increases speed on off-center hits and provides more forgiveness through high MOI.

STABILITY AND SPEED FROM JAILBREAK SPEED FRAME

Our patented A.I. designed Jailbreak Speed Frame provides stability in the horizontal and torsional directions. We've speed tuned the construction, shaping, and positioning to deliver even more speed across the face.

NEW A.I. DESIGNED FACE FOR LOWER SPIN AND INCREASED FORGIVENESS

As the industry leader in Artificial Intelligence, we've added launch and spin to ball speed in our optimization formula. This new formula lowers spin on the face, allowing us to add forgiveness to the driver.

STABILITY AND FORGIVENESS FROM UNIBODY CONSTRUCTION

The titanium unibody construction provides stability and lowers the center of gravity, while our proprietary Triaxial Carbon crown and sole allow us to save weight. This weight is precisely redistributed to increase forgiveness with high launch and a slight draw bias.
