

Rogue ST MAX Irons

Product Name: Rogue ST MAX Irons

Product One-liner: Our Longest Iron Ever

Product Intro:

Callaway are the #1 Irons in Golf because of our groundbreaking innovations that benefit golfers of all abilities. The new Rogue ST Irons are no exception. We're breaking new ground through a high strength 450 A.I. Face Cup that's never been seen before in the golf industry. We've also continued to push innovation through our patented Urethane Microspheres and have massively increased our precision tungsten weighting.

Rogue ST MAX Irons have refined game-improvement shaping and the strongest lofts in the Rogue ST family. They fit a wide range of golfers who want incredible speed, forgiveness, and all-around iron performance.

Features & Benefits

More Ball Speed from the all-new High Strength 450 A.I. Designed Flash Face Cup

An industry-first, we combined high strength 450 steel with our A.I. designed Flash Face Cup. This delivers more ball speed and better ball speed consistency.

New A.I. Face Optimization for Speed, Launch and Spin

We've applied our new A.I. Face Optimization for Rogue ST MAX. It's unique for each model and loft to create spin rate consistency across the face. It creates high launch and COR plus a more controlled landing angle to help hold greens.

Precision Tungsten Weighting for Optimal Launch

Our new precision tungsten weighting features up to 62g of high-density tungsten, a 260% increase over MAVRIK. This provides improved launch conditions and also maximizes speed across the face.

Patented Urethane Microspheres for Pure Feel

Our patented urethane microspheres are now pushed further up the face in Rogue ST irons (up to the 6th groove) to enhance sound and deliver pure feel while maintaining fast ball speeds.

MAX Design for a Wide Range of Golfers

Rogue ST MAX are our longest Rogue ST iron, with refined game-improvement shaping for golfers who want incredible speed, forgiveness, and all-around iron performance.
