Features & Benefits

Speed & Stability from Jailbreak ST

The new A.I.-designed Jailbreak system has been completely redesigned to promote speed and stability. The two Jailbreak frames are pushed to the perimeter, providing stiffness while allowing the face to flex for high ball speeds.

A.I. Face Optimized for Speed, Launch and Spin

From our high strength 455 Face Cup, we've applied an all new A.I. face optimization to include speed, launch and spin. This unique face pattern is customized for each model and loft in the hybrid lineup.

Optimal Launch with More Speed

Up to 24g of precision tungsten allows for precise Center of Gravity (CG) locations, delivering optimal launch with even more ball speed.

Oversized Shaping, Lighter Weight and Refined Soles

We've implemented a larger shape for our easiest-to-launch Rogue ST hybrid design. The lightweight components are engineered for slower swinging players who want to generate more speed.
