Product Name: Rogue ST MAX OS Lite Irons

Product One-liner: Our Fastest Iron Ever

Product Intro:

Callaway are the #1 Irons in Golf because of our groundbreaking innovations that benefit golfers of all abilities. The new Rogue ST irons are no exception. We're breaking new ground through a high strength 450 A.I. Face Cup that's never been seen before in the golf industry. We've also continued to push innovation through our patented Urethane Microspheres and have massively increased our precision tungsten weighting.

Rogue ST MAX OS Lite irons have a refined game-improvement shaping, with high launch, wide soles, and enhanced offset. The Lite version features more loft, lighter shafts and lighter swingweights to make these our highest launching, easiest to swing Rogue ST model.

### Features & Benefits

#### **More Ball Speed from the all-new High Strength 450 A.I. Designed Flash Face Cup**

An industry-first, we combined high strength 450 steel with our A.I. designed Flash Face Cup. This delivers more ball speed and better ball speed consistency.

#### **New A.I. Face Optimization for Speed, Launch and Spin**

We've applied our new A.I. Face Optimization to Rogue ST MAX OS LITE. It's unique for each model and loft to create spin rate consistency across the face. It delivers high launch and COR plus a more controlled landing angle to help hold greens.

#### **Precision Tungsten Weighting for Optimal Launch**

Our new precision tungsten weighting features up to 46g of high-density tungsten, a 188% increase over MAVRIK. This provides improved launch conditions and also maximizes speed across the face.

#### **Patented Urethane Microspheres for Pure Feel**

Our patented urethane microspheres are now pushed further up the face in Rogue ST irons (up to the 6<sup>th</sup> groove) to enhance sound and deliver pure feel while maintaining fast ball speeds.

#### **High Launching and Easy to Swing**

Rogue ST MAX OS Lite irons are built with wide soles, enhanced offset, and a thicker topline vs. Rogue ST Max. The Lite version features more loft, lighter shafts and lighter swingweights to make these our easiest-to-swing model in the family.
