

GREAT BIG BERTHA

A MATERIAL DIFFERENCE IN PERFORMANCE

GREAT BIG BERTHA DRIVER

Our most technologically advanced driver utilizes an ultra-lightweight chassis and easy-to-swing design to increase club head speed and overall distance.

Lightweight Design

This easy-to-swing driver is engineered with an ultra-lightweight design for unmatched distance characteristics. It's nearly 30g lighter than a tour driver, and it's an ideal option for golfers who want to increase their swing speed.

Forged Carbon Sole & Triaxial Carbon Crown

To increase MOI, our engineers paired a lightweight Triaxial Carbon crown with a Forged Carbon sole. With all this discretionary weight, our engineers moved the CG lower and deeper to enhance forgiveness while the steel sole plate makes it easier to hit a draw.

Jailbreak A.I. Speed Frame

Our Jailbreak Speed Frame is powered by A.I. for enhanced horizontal and torsional stability. All this stability promotes increased ball speed across the face.

A.I. Designed Flash Face

We've now included spin optimization in our industry-leading A.I. face technology. The new formula increases ball speed while lowering spin to increase total distance.

GREAT BIG BERTHA DRIVER SPECS			
MODEL	9°	10.5°	12°
LENGTH	45.75"	45.75"	45.75"
CLUBHEAD VOLUME	460cc	460cc	460cc
SWINGWEIGHT	D2	D2	D2
LIE	60°	60°	60°
HAND	RH/LH	RH/LH	RH

HIGH PERFORMANCE COMPONENTS

UST HELIUM NANOCORE
40g (WMS, Light, Reg) / 50g (Light, Reg, Stiff)

WINN DRI-TAC LITE 2.0 (Men's) WINN DRI-TAC 2.0 (WMS)
