

Supersoft Golf Balls

Product Name: Supersoft Golf Balls

Product one-liner: Super long, super straight, super soft

Product Intro:

Supersoft is one of the most popular balls in golf, particularly for its long, straight distance, and most importantly the super soft feel. We've advanced the cover, core, and construction technologies to enhance these key benefits, with improved performance from tee-to-green.

Our HyperElastic SoftFast Core increases ball speed, especially off the driver, while creating soft feel off your irons and around the green. The multi-material construction and dynamic Hybrid Cover also promote long distance, along with exceptional spin, outstanding feel, and short game control. The new softer cover system is engineered for even more greenside spin. Players love this ball, and now it's even better throughout the bag.

Features & Benefits

Increased Ball Speed with Soft Feel From Our HyperElastic SoftFast Core

Optimized for faster speed and soft feel around the green.

Exceptional Feel, Control and Spin with Long Distance From Our Hybrid Cover

Allow us to create more wedge control while still maximizing distance, very soft feel and durability.
