

PARADYM

PARADYM DRIVER

The Paradym driver model provides a refined shape with high MOI and adjustable perimeter weighting. Engineered for players of all skill levels, this club promotes high launch and low spin characteristics along with a neutral ball flight. It's our best combination of distance, forgiveness, and adjustability.

THE NEW PARADYM IN PERFORMANCE

A PARADYM SHIFT IN DISTANCE FROM AN INDUSTRY-FIRST 360° CARBON CHASSIS

360° Carbon Chassis promotes unprecedented weight redistribution for maximized distance. The Triaxial Carbon crown and Forged Carbon sole is 44% lighter than a titanium chassis. This massive weight savings is repositioned for higher MOI and increased forgiveness.

SPEED & STABILITY FROM NEW JAILBREAK A.I.

Our new A.I. designed Jailbreak system provides stability in both the horizontal and torsional direction. Now with a 33% lighter weight design, we've enhanced stability for faster ball speeds from our industry-leading COR.

NEW A.I. DESIGNED FACE OPTIMIZED FOR DOWNRANGE DISPERSION

An all-new A.I. face optimization enhances speed, launch and spin, and now downrange dispersion. This is the world's most advanced driver face designed by artificial intelligence.

INDUSTRY-LEADING FACE CUP AND FORGED TITANIUM FACE FOR FAST BALL SPEEDS

Paradym is the first driver to utilize Callaway's industry-leading face cup technology. We've paired the face cup with a powerful, forged titanium face, a combination that provides higher energy transfer to the ball than a standard driver face insert.

ADJUSTABLE PERIMETER WEIGHTING FOR DESIRED SHOT SHAPE

The driver head features a refined shape with high MOI and adjustable perimeter weighting. From a 15g sliding weight, players can experience an average of 12 yards of shot shape correction.

Spin	Low	Mid	Lowest
Flight Bias	Neutral	Semi Draw	Neutral
Forgiveness	Highest	Highest	High
Footprint	Large	Large	Mid

PARADYM X

PARADYM X DRIVER

Paradym X model is built for a high launch with high MOI, along with a generously stretched profile at address. This model is best suited for golfers seeking extreme forgiveness and a slight draw bias from their driver.

THE NEW PARADYM IN PERFORMANCE

- ✓ **A PARADYM SHIFT IN DISTANCE FROM AN INDUSTRY-FIRST 360° CARBON CHASSIS**
360° Carbon Chassis promotes unprecedented weight redistribution for maximized distance. The Triaxial Carbon crown and Forged Carbon sole is 43% lighter than a titanium chassis. This massive weight savings is repositioned for higher MOI and increased forgiveness.
- ✓ **SPEED & STABILITY FROM NEW JAILBREAK A.I.**
Our new A.I. designed Jailbreak system provides stability in both the horizontal and torsional direction. Now with a 33% lighter weight design, we've enhanced stability for faster ball speeds from our industry-leading COR.
- ✓ **NEW A.I. DESIGNED FACE OPTIMIZED FOR DOWNRANGE DISPERSION**
An all-new A.I. face optimization enhances speed, launch and spin, and now downrange dispersion. This is the world's most advanced driver face designed by artificial intelligence.
- ✓ **INDUSTRY-LEADING FACE CUP AND FORGED TITANIUM FACE FOR FAST BALL SPEEDS**
Paradym is the first driver to utilize Callaway's industry-leading face cup technology. We've paired the face cup with a powerful, forged titanium face, a combination that provides higher energy transfer to the ball than a standard driver face insert.
- ✓ **HIGH LAUNCH & LOW SPIN FROM A FORGIVING SHAPE**
Paradym X is built for a high launch with high MOI, along with a generously stretched profile at address. This model is best suited for golfers seeking extreme forgiveness and a slight draw bias from their driver. 5g of rear weight is positioned to increase launch and lower spin for maximum carry distance.

PARADYM

PARADYM TRIPLE DIAMOND

The Paradym Triple Diamond model is compact, 450cc shape designed for better players who want to work the ball. It's the lowest spinning and lowest launching Paradym model with a neutral ball flight.

THE NEW PARADYM IN PERFORMANCE

- ✓ **A PARADYM SHIFT IN DISTANCE FROM AN INDUSTRY-FIRST 360° CARBON CHASSIS**
360° Carbon Chassis promotes unprecedented weight redistribution for maximized distance. The Triaxial Carbon crown and Forged Carbon sole is 45% lighter than a titanium chassis. This massive weight savings is repositioned for higher MOI and increased forgiveness.
