

TRI-HOT 5K

Tri-Hot 5K is built to improve performance by reducing the amount of side spin on off-center hits. We achieve this through a 303 stainless steel front section that includes the hosel and face area. This material has been finish milled to exact shape and weight, helping to keep the CG forward. This keeps putts closer to the original line, with tighter dispersion, and a greater chance to go in on less-than-perfect strikes.

5K Mallets – Feel Meets Forgiveness

Incredible Forgiveness and Improved Roll From Tungsten Front Weights

We've precisely positioned massive amounts of tungsten (up to 120 grams) behind the face in the toe and heel sections of the club head. The CG is moved forward for improved roll, while also increasing inertia to over 5,000 IZZ. It's a level of forgiveness that you've never seen before in a standard size blade putter, and now it's offered in standard sized mallets.

Interchangeable Front Weights

Available in 5, 10, 15 and 20 grams these removable weights allow you to dial in your head weight to your exact preference.

Legendary White Hot insert

The most popular insert of all time is back with the original formulation, feel, sound, and performance.

Red Stroke Lab Shaft

The newest generation of our proven multi-material Stroke Lab shaft features even better performance. Our Stroke Lab shafts are a staple in professional golf with wins across all global Tours.
