

Product Name: Jaws Raw

Product One-Liner: *Pure Spin in its Rawest Form*

Product Intro:

Jaws Raw brings raw scoring performance to your wedge game. Legendary club designer Roger Cleveland has created a wedge line that combines artistry and craftsmanship with cutting edge innovation.

Jaws Raw features the most aggressive grooves in golf, now with a raw face that promotes maximum spin. For the first time ever, Callaway is bringing tungsten technology to a wedge for a weight balanced club that offers both feel and control.

The family now includes a new C grind developed for skilled & precise players who manufacture multiple shots around the greens. As well, the X grind now extends to 56° and 54°, and the Z grind goes up to 62°.

Features and Benefits

Total Spin Machine

We're taking spin and control to new levels by leveraging:

- Razor sharp grooves, with a 37° wall angle to elevate the groove-edge sharpness. From 80 yards and in, these grooves promote a controlled "one hop and stop" trajectory.
- Raw face. We've removed the plating on the face which allows for rusting over time in the scoring zone, while maintaining the premium look throughout the rest of the clubhead. Removing the plating enables a more direct connection between the ball and the face at impact.
- Offset Groove-in-Groove Technology, which positions the milled micro-grooves at a 20° angle to promote added spin on chips, pitches, and lob shots.
- A muted toe pad on the face reduces glare at address.

New Weight Balanced Design for Enhanced Feel and Improved Scoring Performance

The Pitch, Gap, Sand, and Lob Wedges have been meticulously crafted to enhance their specific performance benefits. Tungsten is in a Callaway wedge for the first time ever, on the sand and lob wedges, to center the CG position for control and feel. Variable length hosels are engineered to control trajectory while enhancing forgiveness.

Versatility and Shot Making with 28 Loft / Bounce Options Per Finish

With 6 grind options across two shapes, lofts spanning 48° to 62°, and two premium finishes, Jaws Raw delivers a full and complete wedge lineup.

Along with the all-new Z grind, the comprehensive Jaws Raw lineup includes a new C grind crescent shape sole, our standard S, wide sole W, and high bounce X grind, providing 28 loft and bounce combinations per finish and shape.

Legendary wedge maker Roger Cleveland has created a classic design, with a straighter leading edge and a smooth hosel connection that removes any notch near the heel. This is feedback straight from our Staff, so golfers everywhere can enjoy Tour-level wedge performance.

Premium Components and Finishes

Available in Raw Face Chrome and an un-plated Raw Black Plasma. Stock shaft options include True Temper Dynamic Gold Spinner 115g (steel) and Project X Catalyst 80g (graphite), paired with the stock Lamkin UTX Charcoal Grip.

*Women's stock shaft option is available in UST Recoil (graphite) with Lamkin Women's Comfort grip.

Callaway Customs Options

Jaws Raw features expanded Callaway Customs options with several color zones, and up to 13 color options to choose from. Medallions, emojis and a variety of stamping options are available to create your own personalized wedge.
