

Paradym Super Hybrid Composite

Product Name: Paradym Super Hybrid

Product One-liner: *Driver-Like Power. Hybrid Confidence.*

Sub-headline: Ultra-High Strength Titanium For Super Power And Distance.

Product Intro:

Do you struggle to hit your fairway woods consistently? Have you ever faced a narrow tee shot that requires power and precision? The all-new Paradym Super Hybrid is designed specifically to be easier to hit than a fairway wood and give you the confidence to take on the most demanding shots on the course.

So what makes the Super Hybrid "Super"? We took the same advanced materials used to make drivers and created a powerful hybrid designed to be extraordinarily long. An all-titanium A.I.-designed face provides explosive power for incredible distance. And an oversized titanium body, triaxial carbon crown, and triple MIM weighting promote extreme forgiveness and a piercing trajectory.

The Paradym Super Hybrid is made for golfers who want the power of a fairway wood and versatility of a hybrid.

Features + Benefits

Driver-Like Power from a Hybrid

The Paradym Super Hybrid leverages advanced materials used in driver design to create a hybrid with driver-like power. A lightweight, yet incredibly strong A.I.-designed titanium face creates explosive speed and incredible distance.

Oversized Titanium Body for Extreme Forgiveness

An all-titanium body allows for a larger overall footprint designed for extreme forgiveness. The Paradym Super Hybrid will be your go-to club on precise shots and everywhere else.

Speed Cartridge for a Penetrating Launch

Up to 91g of tungsten and steel speed cartridges are paired with the triaxial carbon crown work to precisely position the CG for a more penetrating launch.

Complete Adjustability

We've provided complete adjustability with our lightweight OptiFit 3 Hosel, helping you dial in the ball flight and launch that you want to see.
