

HELD TO THE HIGHEST STANDARD

APEX MB IRONS

A PURE BLADE IN A MODERN DESIGN

FEATURES & BENEFITS

Pure Forged Performance

The Apex MB '24 body and face are forged as one-piece from 1025 carbon steel, creating the purest feeling iron imaginable.

Progressive CG Design for Added Control

A progressive CG throughout the set improves trajectory control. The long irons feature a lower CG that promotes towering shots that land soft into greens while the short irons utilize a higher CG for a lower trajectory with more spin for added control.

Dynamic Sole Design for Enhanced Turf Interaction

The new Apex MB '24 irons feature a dual chamfer on the leading edge to cut through the turf more efficiently. A trailing edge chamfer provides relief from the turf after contact for enhanced feel. This Dynamic Sole Design maintains speed through the turf and promotes consistent contact on all shots.

Endless Combo Set Possibilities

The Apex MB '24 iron is a pure blade in a modern design. A thinner topline and longer blade lengths seamlessly blend with the other Apex Pro Series irons for those who want to meet a player's specific needs. All Pro Series irons feature the same MIM back weight to give fitters more control to dial in swing weight.

CLUB	Loft	Availability	Lie	Offset	Build Length
3	20.5	RH/LH	60.0	2.2mm	39.00"
4	23.0	RH/LH	60.5	2.1mm	38.50"
5	26.0	RH/LH	61.0	1.9mm	38.00"
6	30.0	RH/LH	61.5	1.7mm	37.50"
