

Odyssey Ai-ONE Square 2 Square Putter: Media Summary Sheet

Odyssey's new line of Ai-ONE Square 2 Square putters feature a modern center shafted design that makes them Stroke Balanced, so they want to stay square throughout a golfer's stroke. These putters are ideally suited for golfer's looking to minimize their face rotation when they putt.

Ai-One Insert

Designed using Artificial Intelligence, we've created contours on the Aluminum backer of the insert which we co-mold to a White Hot Urethane striking surface to promote consistent ball speed across the face with the classic White Hot feel that Tour players and amateurs love.

Modern Center Shafted Design

Our design centers the shaft on the cg plane of the putter. This results in putters that rest with the toe up in a reverse torque position, opposite of a traditional putter with toe hang. This design promotes a square face throughout the stroke.

Built in Forward Press

3.3° of forward shaft lean presets the hands in a forward press position eliminating the opening of the face that often happens when golfer forward press on their own.

SL 90 Shafts

A lightweight steel shaft with 20-30 grams (depending on the grip) of counterbalance weight in the butt end. This evolution of our Stroke Lab Weighting appeals to even more golfers.

Unique Navy Blue PVD Finish

This line features a beautiful navy blue PVD finish that really sets the apart and gives them a premium look and of course the Jailbird models come with our classic Versa alignment.
