

Square 2 Square

ODYSSEY
#1 PUTTER ON TOUR.®

Putt Squarer

Odyssey's new line of Ai-ONE Square 2 Square putters feature a modern center shafted design that makes them Stroke Balanced so they want to stay square throughout a golfer's stroke. These putters are ideally suited for golfer's looking to minimize their face rotation when they putt.

Ai-One Insert

Designed using Artificial Intelligence, we've created contours on the Aluminum backer of the insert which we co-mold to a White Hot Urethane striking surface to promote consistent ball speed across the face with the classic White Hot feel that Tour players and amateurs love.

Modern Center Shafted Design

This design centers the shaft on the cg plane of the putter. This results in putters that rest with the toe up in a reverse torque position, opposite of a traditional putter with toe hang. This design promotes a square face throughout the stroke.

Built in Forward Press

3.3° of forward shaft lean presets the hands in a forward press position eliminating the opening of the face that often happens when golfer forward press on their own.

Standard, Cruiser and Broomstick configurations

There will be Square 2 Square putters in Standard, Cruiser and Broomstick configurations for the three most popular putting techniques.

SL 90/140 and 180 Shafts

Different shafts for different configurations provide the proper weight and balance to complement the different head weights and lengths that are offered.

Unique Navy Blue PVD Finish

This line features a beautiful navy blue PVD finish that really sets the apart and gives the a premium look and of course the Jailbird models come with our classic Versa alignment.

Odyssey Oversized and Overlength Grips

The standard length versions in this line get our Oversize grip, the Cruisers get our Oversize 17" grip and the Broomstick gets our two-piece Broomstick grip.
