

## **Odyssey Ai-ONE Square 2 Square Max 1 and Max Stripe**

Intro:

Odyssey's line of Ai-ONE Square 2 Square putters feature a modern center shafted design that makes them Stroke Balanced so they want to stay square throughout a golfer's stroke. These putters are ideally suited for golfer's looking to minimize their face rotation when they putt. Now the new Ai-ONE Square 2 Square Max 1 and Max Stripe are provided in our most stable Square 2 Square models yet with a high MOI over 6300 lzz along with our Ai-ONE insert for more consistent ball speed across the face.

### **Our Most Stable Square 2 Square Putters**

Ai-ONE Max 1 and Max 1 Stripe are our highest MOI Square 2 Square Putters. The Max 1 features a simple sight line in the middle of the design, while the Max Stripe features our bold alignment line using Versa 90 alignment for better alignment in your set up and throughout the stroke.

### **Ai-One Insert**

Designed using Artificial Intelligence, we've created contours on the Aluminum backer of the insert which we co-mold to a White Hot Urethane striking surface to promote consistent ball speed across the face with the classic White Hot feel that Tour players and amateurs love.

### **Modern Center Shafted Design**

This design centers the shaft on the cg plane of the putter. This results in putters that rest with the toe up in a reverse torque position, opposite of a traditional putter with toe hang. This design promotes a square face throughout the stroke.

### **Built in Forward Press**

3.3° of forward shaft lean presets the hands in a forward press position eliminating the opening of the face that often happens when golfer forward press on their own.

### **SL 90/140 and 180 Shafts**

Different shafts for different configurations provide the proper weight and balance to complement the different head weights and lengths that are offered.

### **Unique Navy Blue PVD Finish**

This line features a beautiful navy blue PVD finish that really sets the apart and gives the a premium look.

### **Odyssey Oversized and Overlength Grips**

The standard-length versions in this line get our Oversize grip.
