

# CB 12

## A NEW SPIN ON FORGIVENESS

### Modern, Confidence-Inspiring Cavity Back Shape

A deep cavity back, larger head, and thicker topline inspire trust at address. The chamfered leading edge resists digging, while 12g perimeter weighting boosts forgiveness. Urethane Microspheres ensure a soft, responsive feel.

### Wide Sole Tri-Sole

The Tri-Sole design adds versatility to a forgiving wide sole, making it easier to handle a variety of shots without sacrificing playability.

### Easy Spin and Control from OPUS Grooves

Featuring the new OPUS groove platform, the CB12 Wedge is built to deliver easy spin and control—whether you’re attacking the pin or escaping tough lies.
