Ti FUSION

APEX Ti FUSION 250 PLATED

All-New Chrome Plated Finish

The Apex Ti Fusion 250 showcases a breakthrough in materials engineering—a proprietary Callaway process that makes chrome plating on titanium possible. This exclusive finish delivers a bold, timeless look that sets a new standard in premium design.

Built for Confidence and Forgiveness

Apex Ti Fusion 250 offers a larger footprint than the original, with a thicker topline, added offset, and extended blade length. The result? A more confidence-inspiring look at address and greater forgiveness when you don't catch it pure.

Superior Materials, Unmatched Performance

Titanium is an advanced material that provides unmatched iron performance. Our industry-leading brazed titanium construction capitalizes on the power of a titanium face combined with the exceptional forged feel of steel. No other iron combines these performance materials into one iron like we have in the Apex Ti Fusion family.

Unimaginable Feel

Apex Ti Fusion 250 utilizes a combination of advanced materials to achieve an unimaginable feel. The titanium face allows for more deflection and interaction with our patented urethane microspheres. This interaction coupled with a forged, steel body provides a unique feel that is typically only found in single-piece forged irons, now available in a larger, confidence inspiring distance iron.

Incredibly Consistent Ball Speed, Spin, Dispersion, and Forgiveness

The titanium Ai Smart Face yields incredibly consistent ball speed, spin, and dispersion. The result is the performance of a 2-piece iron with loads of forgiveness and the consistency of a muscleback.

APEX Ti FUSION 250 PLATED IRON PRODUCT SPECIFICATIONS					
CLUB	LOFT	LIE	LENGTH	OFFSET (MM)	AVAILABILITY
5	23°	61°	38.5"	4.65	RH
