

APEX UW

Tour-Proven Versatility, Combining the Playability of a Hybrid with the High-Launch of a Fairway Wood

The Apex UW is designed for serious, avid golfers seeking the perfect blend of a fairway wood's power and a hybrid's versatility. Engineered with Tour feedback and loaded with performance technologies, it delivers a higher, more neutral ball flight with the control all players demand.

Features + Benefits

TUNGSTEN SPEED WAVE

A dynamic, 41g+ tungsten wave structure positions mass low and forward, enhancing ball speed and launch—particularly on low-face strikes where players tend to lose distance.

STEP SOLE DESIGN

A redesigned sole with a stepped geometry reduces turf interaction, helping to maintain swing speed through impact and promoting more consistent contact across different lies.

TRIAXIAL CARBON CROWN

The lightweight carbon construction allows for strategic weight redistribution, creating a more forgiving clubhead while refining launch and spin for greater shot-making control.

TOUR-INSPIRED SHAPING

Designed with input from the world's best, the compact, refined shape and neutral face angle inspire confidence at address and deliver workability from tee to turf.
