

OPUS

SP

For players who demand precision on every shot, OPUS SP is purpose-built to flight the ball lower, increase spin, and maximize control—especially from scoring distances. With advanced constructions, refined face groove technology, and Tour-preferred shaping, OPUS SP wedges are your short game's ultimate scoring tools.

SPIN POCKET™ CONSTRUCTION

A re-engineered 2-piece construction head design strategically reshapes mass to optimize CG locations. The Spin Pocket redistributes weight higher, raising the CG, and promoting a lower, more penetrating launch. The result is more spin and enhanced control, especially when you need to flight shots or attack tight pins.

NEW SPIN GEN 2.0 FACE™

The most advanced face in OPUS history. A new 17° groove angle with tighter pitch spacing delivers more groove edge contact for more consistent spin across a variety of lies. Combined with a deeper cross-hatch laser pattern across the face, Spin Gen 2.0 produces enhanced friction for more bite and stopping power on all types of approach shots.

SHAPE 6 - TOUR-VALIDATED PROFILE

Trusted by Tour players for its clean, confident look at address, Shape 6 offers precise leading edge shaping and refined sole geometry. Shape 6 is the 6th and final iteration in the Opus prototype shaping phase, validated by Tour players and major champions. OPUS SP introduces progressive shaping in gap wedges to seamlessly blend with modern iron sets—creating a more cohesive setup from top to bottom.

X GRIND - VERSATILITY WITH BOUNCE

Back by popular demand, the X Grind returns in OPUS SP. Designed for shotmakers who want added bounce for forgiveness, without giving up versatility, the X Grind is ideal for players who like to open the face around the greens or play in firmer turf conditions. It's the perfect blend of playability and performance in a wide range of shots and conditions.
