

## Quantum Max Fast Driver

Quantum Max Fast is built to make speed and launch effortless for players who benefit from a lighter overall club — with a lightweight, high-MOI design and a shallower face to help generate speed. It features our Tri-Force Face and next-gen AI face mapping, engineered for precise speed and control across more of the face.

### Features + Benefits

#### **Introducing Tri-Force Face**

Unreal speed and distance, even on off-center hits, made possible by a breakthrough Tri-Force Face that layers ultra-thin, high-strength Titanium, Poly Mesh, and Carbon Fiber into a fully integrated speed system — a combination never before used in Driver face design.

#### **Next Generation Ai-Optimized Face Design**

Consistent performance across the entire face, thanks to smarter face flex unlocked by Ai that now accounts for how Ultra-thin Titanium, Poly Mesh, and Carbon Fiber work together. Every part of the face is precisely tuned through advanced Ai modeling to optimize speed, spin, launch, and accuracy based on real impact patterns.

#### **360° Carbon Chassis**

Our lightest, strongest chassis yet, the 360° Carbon Chassis frees up weight for improved forgiveness, tighter dispersion, and precise CG placement — with a woven sole design for added visual appeal.

#### **Lightweight Design**

Built for moderate swing speed players, this ultra-forgiving, lightweight Quantum Max Fast features our 360° Carbon Chassis to save weight and increase stability — helping boost clubhead speed, launch higher, and maximize carry with less effort.

#### **Easy-To-Hit, Confidence-Inspiring Shape**

A streamlined, forgiving shape that looks and feels easy to hit, helping you set up and swing with confidence.
