

Quantum Triple Diamond Driver

Tour-inspired and compact, Quantum Triple Diamond is built for better players seeking lower spin, workability, and a penetrating flight with our Tri-Force Face and next-gen Ai face mapping engineered for precise speed and control.

Features + Benefits

Introducing Tri-Force Face

Unreal speed and distance, even on off-center hits, made possible by a breakthrough Tri-Force Face that layers ultra-thin, high-strength Titanium, Poly Mesh, and Carbon Fiber into a fully integrated speed system — a combination never before used in Driver face design.

Next Generation Ai-Optimized Face Design

Consistent performance across the entire face, thanks to smarter face flex unlocked by Ai that now accounts for how Ultra-thin Titanium, Poly Mesh, and Carbon Fiber work together. Every part of the face is precisely tuned through advanced Ai modeling to optimize speed, spin, launch, and accuracy based on real impact patterns.

Advanced Perimeter Weighting (APW) – Neutral & Fade Settings

The refined 10g weight system lets you adjust for a neutral or fade setup, helping you fine-tune shot shape and launch direction. Its more compact design makes it easy to personalize your ball flight for more confidence off the tee.

360° Carbon Chassis

Our lightest, strongest chassis yet, the 360° Carbon Chassis frees up weight for improved forgiveness, tighter dispersion, and precise CG placement — with a woven sole design for added visual appeal.

Tour-Validated Shape

Built for better players who want lower spin, workability, and a penetrating flight. A deeper face, fade-ready weighting, and a Tour-validated, 450cc shape deliver the speed and control better players demand.
