

## Quantum Triple Diamond Fairway Woods

Quantum Triple Diamond's compact, tour-validated shape with a deeper face and neutral CG gives better players the control and workability they want, with penetrating launch and optimized spin.

### Features + Benefits

#### **Speed Wave 2.0**

Positions weight low and forward for faster ball speeds and consistent launch. The new Speed Wave 2.0 design frees up even more face flex, boosting energy transfer — especially on low-face strikes.

#### **New Step Sole Design**

The new Step Sole Design reduces turf contact on the sole for efficient strikes and consistent center-face contact. A reshaped heel adds stability through impact, helping keep the face square for greater control and accuracy.

#### **Next Generation Ai-Optimized Face Design**

Consistent performance across the entire face, thanks to smarter face flex unlocked by Ai. Every part of the face is precisely tuned through advanced Ai modeling to optimize speed, spin, launch, and accuracy based on real fairway wood impact patterns.

#### **Tour-Validated, Versatile Shape**

A compact, tour-validated shape, Triple Diamond is built for players who value control and workability. A neutral CG delivers speed, optimized spin, and consistent performance in a fairway wood built for precision.

#### **OptiFit4 Hosel Adjustability (3W-5W)**

Features independent loft and lie adjustability, offering eight total configurations to fine-tune launch angle and shot shape—whether you're looking for a higher trajectory, straighter ball flight, or a draw-biased setup.
