

Chrome Tour X Golf Ball

The new Chrome Tour X Golf Ball features a revolutionary Tour Fast Mantle, created to increase ball speed by acting like a stiffer spring at impact. This is the first time this material has been used in a golf ball; it's faster and 16% more responsive than our previous materials.

The design also features our Advanced Seamless Tour Aero with an optimized Hybrid Aero Pattern that provides incredible distance and flight consistency on every shot. Plus, each Chrome Tour X is manufactured with Precision Technology, engineered to ensure maximized performance throughout your game.

Features + Benefits

Tour Fast Mantle

Revolutionary new Tour Fast Mantle is a Higher Flex Modulus material that acts like a stiffer spring to increase distance. This advanced core/layer system is faster and 16% more responsive than previous materials used in our golf balls.

Advanced Seamless Tour Aero

The Seamless Tour Aero has an optimized Hybrid Aero Pattern that provides incredible distance and flight consistency on every shot.

Precision Tour Urethane Cover

This high-performance cover is developed for exceptional greenside spin and control.

Precision Technology

Provides the ultimate in consistency. Every detail in the design, manufacturing, and testing of the Chrome Tour X Ball has been engineered to ensure maximized performance throughout your game.

Who Chrome Tour X Is For

The gold standard Tour ball for players who want maximum speed and ultimate control. Outstanding distance, workability, spin, and tee-to-green performance.
