

Ai-DUAL

Square 2 Square

**Feel. Speed Control.
Enhanced Forward Roll.
A Complete Zero Torque
Revolution.**

Odyssey's new line of Ai-DUAL Square 2 Square putters feature our latest and greatest Ai-DUAL insert and a modern center shafted design that makes them balance with the toe up and puts them in the "Zero Torque" putter category.

Ai-DUAL Insert

Designed using Artificial Intelligence, this dual-layer urethane insert has a soft outer layer and a firm inner layer delivering not only consistent ball speed across the face, but also enhanced forward roll up and down the face and amazing feel.

New FRD Groove

This new Forward Roll Design Groove is deeper and more aggressive. With a 19° slope it works in conjunction with the dual layer design to improve forward roll up and down the face.

Modern Center Shafted Design

This design centers the shaft just underneath the CG plane of the putter. This results in putters that rest with the toe up, opposite of a traditional putter with toe hang. This design promotes a square face throughout the stroke.

Built in Forward Press

2° of forward shaft lean presets the hands in a forward press position eliminating the opening of the face that often happens when golfer forward press on their own.

New Reverse Taper Grip

This grip is designed to offset the 2° of shaft lean that these putters come with and get the leading edge of the grip parallel to the leading edge of the putter providing a more comfortable set up.

MODEL	HEAD TYPE	HOSEL	LOFT	RH/LH	STANDARD LENGTHS	LIE	OFFSET	TOE HANG	HEAD WEIGHT	RELEASE
Square 2 Square										
#7	Mallet	S2S	3°	RH	33", 34", 35"	72°	N/A	90 UP	360g	January 26
Jailbird	Mallet	S2S	3°	RH/LH	33", 34", 35"	72°	N/A	90 UP	360g	January 26
Max 1/2 Ball	Mallet	S2S	3°	RH/LH	33", 34", 35"	72°	N/A	90 UP	365g	January 26
Square 2 Square Cruiser										
Max 1/2 Ball	Mallet	S2S	3°	RH	38"	72°	N/A	90 UP	380g	January 26
Max 1/2 Ball Broomstick	Mallet	S2S	3°	RH	48"	78°	N/A	90 UP	500g	January 26

Black SL 120 Shaft

The standard length models come with our SL 120 shaft, developed based on Tour player feedback, it is heavier and stiffer than our SL 90 and ideally suited for this style of putter.

Cruiser and Broomstick Options

The MAX models are available in Cruiser and Broomstick configurations that come with: heavier heads, longer shafts and longer grips suited to each of these putting styles.

½ Ball Alignment Options

The MAX models offer Odyssey's next revolutionary alignment technology, the ½ Ball design frames the ball helping to center your impacts and improve your aim.
