

Chrome Soft Golf Ball

The new Chrome Soft Golf Ball features a revolutionary Tour Fast Mantle, created to increase ball speed by acting like a stiffer spring at impact. This is the first time this material has been used in a golf ball.

This design also features our Advanced Seamless Tour Aero with an optimized Hybrid Aero Pattern that provides higher ball flight, distance and consistency on every shot. Plus, each Chrome Soft is manufactured with Precision Technology, engineered to ensure maximized performance throughout your game.

Features + Benefits

New Tour Fast Mantle

Revolutionary new Tour Fast Mantle is a 16% higher Flex Modulus material that increases ball speed, acting like a stiffer spring for optimized distance. This advanced core/layer system is faster than previous materials used in our golf balls.

Advanced Seamless Tour Aero

For higher ball speed, distance, and consistency on every shot. The Seamless Tour Aero has an optimized Hybrid Aero Pattern that provides incredible distance and flight consistency on every shot.

Precision Tour Urethane Cover

This high-performance cover is developed for incredible shot stopping wedge control and greenside spin with soft feel.

Precision Technology

Provides the ultimate in consistency. Every detail in the design, manufacturing, and testing of the Chrome Soft Ball has been engineered to ensure maximized performance throughout your game.

Who Chrome Soft Is For

Chrome Soft is for players who want a Tour quality ball with fast ball speeds, higher ball flight, greenside control, and soft feel.
