

Opus SP+ Chrome Wedge

Product Name: Opus SP+ Chrome Wedge

Intro:

Introducing the all-new Opus SP+ with Spin Pocket™ Construction + Tungsten, a new extension of our Opus SP family. Tour-preferred shaping with an even higher center of gravity for more spin and precision.

Brian Herr, R&D Manager - Wedges: “Opus SP+ takes on the best qualities of Opus SP, with lower launch, more spin, and engineering control. We’ve taken the Spin Pocket and made it larger; we’ve hollowed out more of the sole and doing that allows us to put Tungsten up in the topline. We have a larger Spin Pocket than we had in Opus SP. We’ve also added even more Tungsten up top to raise the CG, which allows us to flight the ball lower for more control.”

Features + Benefits

SPIN POCKET™ CONSTRUCTION

Opus SP+ features a re-engineered 3-piece construction head design (Tungsten, MIM Face, Cast 8620 Body) that strategically reshapes mass to optimize CG locations – with a 25% larger Spin Pocket compared to Opus SP. The construction redistributes weight higher, raising the CG, and promoting a more penetrating launch. The result is more spin and enhanced control, especially when you need to flight shots or attack tight pins.

TUNGSTEN WEIGHTING

Positioned on the topline of the wedge, there is 23% more tungsten in Opus SP+ compared to Opus Platinum. The tungsten works in tandem with the Spin Pocket Construction to raise the CG even higher, generating more spin and a flighted launch - from full shots to pitches around the green.

NEW SPIN GEN 2.0 FACE

The most advanced face in OPUS history. A new 17° groove angle with tighter pitch spacing delivers more groove edge contact for more consistent spin across a

variety of lies. Combined with a deeper cross-hatch laser pattern across the face, Spin Gen 2.0 produces enhanced friction for more bite and stopping power on all types of approach shots.

SHAPE 6 – TOUR-VALIDATED PROFILE

Trusted by Tour players for its clean, confident look at address, Shape 6 offers precise leading edge shaping and refined sole geometry. Shape 6 is the 6th and final iteration in the Opus prototype shaping phase, validated by Tour players and major champions.

Grinds + Specs

Opus SP+ is available in Z Grind (friendly-low bounce option), a new X Grind (for maximum greenside versatility), and S Grind (for every situation). Specs are optimized with increased lob/sand wedge swingweights to D5 (D3 for Gap and PW). Shafts are True Temper DG S200, and True Temper Icon Velvet Grips.
