GRIND COMPARISON CHART

T-Grind | Tour Inspired for Precise Shotmaking

Developed for tour players with tremendous feel and touch around the greens, the T Grind is a shot makers grind. Shaped with tons of heel relief, the leading edge will stay low even when opening the face. The T grind will pick the ball cleanly off tight lies with little to no divot for confident players on firm conditions.

C-Grind | Maximum Versatility for Skilled Players

A crescent grind, designed with toe and heel relief to keep the leading edge low when opening the face. Players who can maintain swing speed through the ball while opening the face, are able to manufacture a variety of green side shots with the C grind.

X-Grind | Versatility with Bounce

Back by popular demand, the X-Grind returns in OPUS SP and SP+. Designed for shotmakers who want added bounce for forgiveness, without giving up versatility, it is ideal for players who like to open the face around the greens or play in firmer turf conditions. It's the perfect blend of playability and performance in a wide range of shots and conditions.

S-Grind | A Grind for Every Situation

Standard medium-width sole with a slight ribbon at the back, and moderate heel relief to keep the leading-edge low through impact. This is our most popular grind option for a wide variety of conditions and swing types.

W-Grind | Wide Sole for Max Forgiveness

Our widest full sole option with generous camber and high bounce to promote skidding and reduce digging. This is our most forgiving sole grind. 12° and 14° of bounce.

Z-Grind | Low Bounce with Versatility

A tri-level sole design, with an aggressive leading-edge chamfer that acts as a skid plate for enhanced turf interaction. The chamfer also reduces digging, making this a more playable low-bounce grind.
