

Full Toe SP Wedges

Full Toe SP is designed for players who open the face, demand control, and need versatile bunker play. Combining full-face Spin Gen 2.0 grooves with 44% more groove area than conventional shaped wedges, a new, refined shape, and optimized CG weighting from Spin Pocket™ construction, delivering high spin across the face, aggressive stopping power, and versatility.

FEATURES & BENEFITS

NEW FULL TOE SHAPE

The Full Toe shape provides more face area with an enhanced toe height for players who like to open the face. The shaping is designed to add versatility and confidence to short shots around the green and out of the bunker.

FULL FACE GROOVES

With Full Face Spin Gen 2.0 grooves running heel to toe, 44% more groove area, and a 17° tighter pitch spacing, Full Toe SP generates more groove edge contact and aggressive stopping power for maximum short game versatility.

SPIN POCKET™ CONSTRUCTION

By strategically removing mass low and shifting it up, we've created our highest CG ever delivering maximum spin and improves versatility on open-face shots.

VERSATILE GRIND OPTIONS - J & JW

The J Grind features lower effective bounce with aggressive heel relief and added camber, allowing it to open easily while maintaining stability on fuller shots. The JW Grind (62° only) evolves the design with a wider sole and higher bounce to make bunker play more accessible without sacrificing short-game versatility.
