TRTL Putters Summary Sheet

Product Name: TRTL

One-liner: TRUST THE TRTL

Product Intro:
The Odyssey TRTL and TRTL MAX are all-new shapes designed to deliver exceptionally high MOI in a modern, confidence-inspiring design. They feature our new Twin Track alignment for players who prefer a long uninterrupted line. Every model features our new Ai-Star insert, a dual layer construction combining urethane and aluminum engineered to deliver consistent ball speed across the face and improve forward roll while delivering the iconic Odyssey feel.

Features & Benefits

TRTL Shape
This all new mid-mallet shape is designed for easy alignment and high MOI in a clean, confidence inspiring shape. It reflects the modern mallet trend favored by Tour players and amateur golfers alike and has already generated significant buzz since it's dubut on Tour.

TRTL MAX Shape
This all new larger mallet shape is designed with multiple alignment options and maximum MOI in a clean confidence inspiring shape.

Multi-Material Construction
The body of the TRTL putters are crafted from steel and finished in a premium black PVD, the shell is made from a lightweight ABS and the sole or belly is made from lightweight aeorpsace-grade aluminium. This advanced multi-material construction allows weight to be pushed to the perimeter of the putter to maximize MOI for greater stability and forgiveness.

Twin Track Alignment
Twin Track Alignment is designed for players that aim best with long uninterrupted lines.

Engineered to Sit Square
Soling is one of the most critical elements in putter performance because how the head sits at address directly influences alignment, confidence, and consistency. Engineered with all new sole geometry, this putter is designed to sit naturally square the moment it is placed behind the ball. The refined rake and camber work together to help the head sole flush to the ground and settle into proper alignment, giving players a more confident setup and a more consistent start to every stroke.

Adjustable Perimeter Weighting

Four discrete weights postioned in the corners of the putter head allow for unprecedented adjustability in an Odysssey mallet allowing you to move the cg towards the front, rear, heel or toe of the head and fine tune the amount of toe hang the putter has. Weight kits, sold separately, allow for further customization.

Ai-Star Insert
Designed using Artificial Intelligence, this advanced dual-layer insert has an aluminum inner layer with a firmer urethane layer on the outside striking surface. This design delivers speed consistency across the face, incredible forward roll up and down the face, and a firmer responsive feel.

F.R.D. Groove Design
This new Forward Roll Design groove design is deeper and more aggressive with a 19° slope it works in conjunction with the dual layer design to improve forward roll up and down the face.

New Tour Pistol Grip
This new grip was developed from Tour feedback, it has crisp edges that fit comfortably in your hands and give you a better awareness of where the putter face is throughout your stroke.

Black SL 120 Shaft
Our Tour preferred SL 120 shaft available in a beautiful black PVD to complement the coloring of the head

Cruiser and Broomstick Options
The TRTL MAX models are available in Cruiser configurations for players seeking the added stability of longer and heavier setups. They feature a heavier head, a heavier SL 140 shaft, and longer grips (17” for the 38” version and 15” for the 36” version).

The TRTL MAX Broomstick model comes with a heavier 445 gram head, a heavier SL 200 shaft, and a two-piece grip designed specifically for the Broomstick style of putting.
